Insights and Inspiring Journeys
from Our Esteemed Alumni

Legacy in Motion

The true legacy of any institution is reflected in the success of its alumni. Here, we recognize their accomplishments, appreciate their impact, and share the insights they've gathered. May their stories inspire and pave the way for future generations.

College isn't just about earning a degree—it's about discovering who you are. For me, CCET was where I built lifelong friendships, stepped outside my comfort zone, and truly grew as a person. Whether it was performing on stage in dramatics, walking the runway in fashion club, or sharing unforgettable moments with friends, every experience shaped me in ways that went far beyond academics. My peers and professors played a huge role in helping me develop confidence, resilience, and the courage to chase my dreams. And that's exactly what I did. Even with an engineering degree in hand, my passion for dance led me down a different path.

I took the risk of building a business in a field I loved. It wasn't easy, but through perseverance, I not only made it successful but also later earned an admit to a top 10 U.S. MBA—an experience that transformed my career.

So, here's my advice to every student: don't limit yourself. College is just the beginning, and your journey is yours to shape. Study hard, but also take the time to learn from those around you. Build meaningful friendships, explore your passions, and get involved in activities that challenge and inspire you. And most importantly, never be afraid to reach out—your alumni network is a powerful resource, and we're always here to help. Success isn't about following a set path; it's about creating your own.

SANCHI GOEL

Batch : 2010-2014 ECE
Sr. Product Manager at Amazon

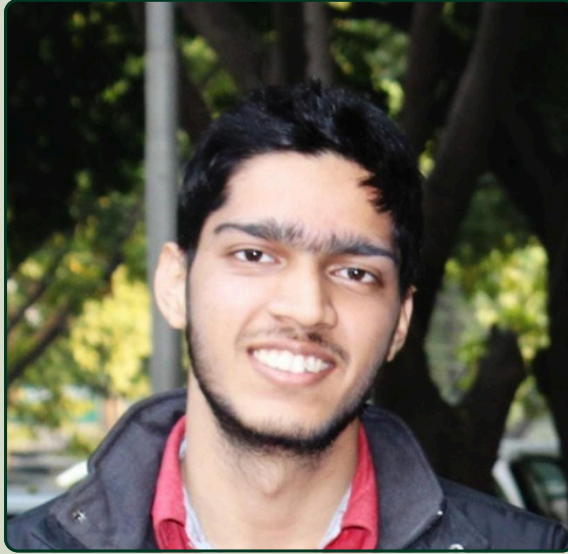

AKSHAY SINDHU

Batch : 2013-2017 MECH
HRBP at Flutter Entertainment

My journey through CCET was pivotal in terms of providing me opportunities to learn and apply, which prepared me for my path ahead for management education and the corporate world. The ample amount of avenues, academic as well as extra curricular groomed me into a better individual by providing opportunities to groom and hone my talents in the college.

As an alumnus, my advice to current students would be: Make the most of your time in college. Academics are important, but so are the experiences, friendships, and personal growth that come with it. Get involved, network with professors and peers, take risks, and don't be afraid to step out of your comfort zone. The skills and connections you build now will shape your future in ways you may not yet realize.

Most importantly, enjoy the journey—college is a unique chapter of life that you'll look back on fondly. Make it count!

**ANMOL THAKUR**

Batch : 2013-2017 ECE
Senior Consultant at EY

Training and Placement Cell (TPC) have been instrumental in acting as a bridge between recruiters and college campus. TPC provided me with an interesting opportunity to work with people from diverse background striving for a common goal. I am thankful to respected teachers, staff and teammates for their valuable contribution, their guidance and support have helped me alot personally and professionally.

As an alumnus I would just like to say, "College is more than just academics—build connections, explore new opportunities, and embrace challenges. Step out of your comfort zone, manage your time wisely, and take care of yourself. These years will shape your future, so make them count!"

SANJAY KUMAR VERMA

Batch : 2013-2017 CIVIL

**Founder and Principal Architect, Sanverma
Design**

As an alumnus of CCET, I am honored to share my journey and experiences. One of the most valuable aspects of CCET is the opportunity for students to gain hands-on training, whether through software courses or industrial exposure.

In my second year, I undertook a four-week site training, which helped me realize that on-site jobs weren't the right fit for me. Recognizing my passion for design, I pursued a six-week AutoCAD software training in my third year. This shift led me to explore freelancing, and by my final year, my freelance projects were generating more income than any other job available for a fresher during that time.

Seeing the rapid growth, I chose to scale my freelance work into a full-fledged architectural design firm rather than pursuing government exams or job applications. Today, I lead a team of five designers, providing architectural, design, and rendering services to clients across the US and Canada, with lifetime sales exceeding one million dollars.

My advice to students is to gain as many skills as possible and never be afraid to take risks. Looking back, if I hadn't explored different opportunities in college, I wouldn't have discovered what I truly love doing.

"Once you find a job that you love and master it, you will never have to work a day in your life."

DEVANSHU DEV GOEL

Batch : 2016 -2020 CSE

Assistant Manager, Union Bank Of India

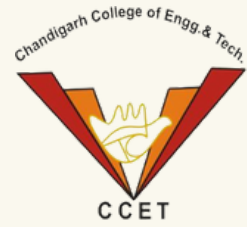

“My time as a Computer Science Engineering student at Chandigarh College of Engineering and Technology has been nothing short of transformative. Beyond the technical skills and industry insights I gained, the friendships I built during these years are ones I will cherish for a lifetime. From late-night study sessions to unforgettable moments at college fests, every experience has left a lasting impression.

The faculty played a significant role in shaping my journey, providing not only excellent academic guidance but also unwavering support throughout. Their expertise and mentorship helped bridge the gap between classroom learning and real-world applications.

I also had the privilege of serving as the Marketing Head for our technical and cultural festival, Apratim, and as the Head of the Hostel Cultural Committee. These roles were pivotal in honing my leadership and team-building skills. Managing teams, strategizing, and working under pressure taught me the importance of collaboration and effective communication—qualities that I carry with me to this day.

Additionally, initiatives like the Training and Placement Cell (TPC) were instrumental in bringing top companies to campus, ensuring students like me had the opportunity to kickstart our careers. Meeting people from diverse backgrounds and building connections with industry leaders has been an invaluable part of my journey. I will always look back on my years here with immense gratitude and pride.”
